EASP

WHO ARE WE?

The EASP is a public company of the Andalusian Government, attached to the Regional Ministry of Health and Consumer Affairs

It contributes through its work to the health systems innovation, the health improvement of the population and the promotion of scientific and technical collaboration and exchange at national and international level.

EASP

WHAT DO WE DO?

The EASP integrates, through its Teaching, Consultancy and Research projects, the Public Health and Health Management approaches, with the aim of...

- ▶ Generate new knowledge and disseminate it among members of health organizations.
- ▶ Develop a continuous process of updating knowledge in response to changing social demands and evolving health systems.
- ▶ Identify the relevant existing knowledge in organizations and the information flows needed for its transmission.
- ▶ Create spaces for the exchange and circulation of information and facilitate the transfer between the ones who need it and the others who generate it.
- ▶ Materialize knowledge by creating products, services and systems and implement them in organizations.
